

The MITIGATOR

High Speed, Quick Strike
HexaCopter Tactical UAV

DESIGNED
ENGINEERED
MANUFACTURED

IN THE USA

Vayu's Mitigator is a high speed, quick strike Hexacopter designed for USAF Security Forces support of ICBM security. This compact, agile airframe with 6 lift motors gives it the strength and ability to release a wide variety of accessories.

The Mitigator can be outfitted with CS gas, pepper smoke, flash grenade, microphone, speaker, camera, starlight camera, and infrared light.

While designed for indoor flight, it can also be used effectively in other GPS compromised environments.
